Subject: Request for Organizing and Collaborating Dengue Awareness Program

Dear sir/Madam

I am writing to request your esteemed support and collaboration in organizing a Dengue Awareness Program at our college, Amdabad Madhyapally, on April 06, 2023. This initiative is being organized by the NSS unit and Students' Welfare Committee with the aim of educating students, staff, and the residents of the surrounding villages about Dengue fever, its prevention, and control measures.

Dengue fever has become a significant health concern in our region, and it is crucial to take proactive measures to educate the community about its risks and the steps that can be taken to mitigate them. We believe that the expertise and resources of Reyapara Rural Hospital will be invaluable in making this program a success. We kindly request your assistance with a qualified medical professional to deliver a lecture or presentation on Dengue awareness.

We are confident that your expertise and resources will significantly benefit our awareness program and contribute to the community's well-being. Our NSS unit is committed to making this event a success, and we are ready to assist in any preparatory work required.

Thank you for considering our request. We look forward to your positive response and a fruitful collaboration.

Thanking you.

Yours sincerely,

Principal

Report of Dengue Awareness Programme

A one day Dengue awareness camp was organized by the National Service Scheme of our college on 06.04.2023, in collaboration with Reyapara Rural Hospital programme officers Prof.Parimal Mandal,NSS Unit I, had made all the arrangements for the camp. The camp was formally inaugurated by our Principal Dr. Ratan Kumar Samanta, Our Prof Hiya Chatterjee, Arpita Majumder had extended tremendous help for the successful completion of the camp.As speaker Dr. Sandipan Mishra ,BMOH,Reyapara Rural Hospital participated in this camp. He gave awareness about the dengue, especially about various stages of Aedes mosquito and its various stages of growth like pupa, larvae, worm, insect, etc., He explained the symptoms of Dengue Fever, like continuous vomiting, knee pain, stomach pain, headache, and body pain, and also gave awareness about where it will be in, like breeds in Flower pots, Water coolers, Refrigerators, and Wastages etc. The dengue mosquito prefers to bite its prey on the ankles, legs and knees. The total 61 audiences (alongwith students,NSS, Volunteers and villagers) had enthusiastically participated. In and around of our college campus some of the water with larva in it were found and destroyed by "ABATE", which is a powerful larvicide that effectively controls mosquito larvae as the first line of defense against Dengue Mosquito. The awareness camp was really conducive to keep the environment free from Dengue virus.The awareness program also disseminated a note of awareness to the volunteers, students and present villagers.Hope that will make the villagers aware.
