Green policy

A green and clean healthy environment aids effective learning and provides a conducive learning surrounding. Educational institutes are becoming more sensitive to environmental factors and more efforts are being made to make them ecofriendly.

The institution is committed to the safe and sound environment performance of the institute and gives paramount importance to the sustainability right from the inception of it. The institute has adopted cohesive planning to enable resource efficient in close it and sustainable approaches to enhance green environment for improved liability, health and climate.

The policy emphasis on practices and methodologies pertaining to areas of significant environment concern e.g. land, energy, waste, water, air etc.

Energy:

Passive building design strategy of the building.
Use of energy appreciate pictures in the campus.
Renewable energy generation harnessing the sun.
Campaign/ workshop encouraging responsible energy use.

Land:

Developing green gardening strategy like mulching and drip irrigation.

Land utilisation through agro forestry and kitchen gardening.

Increasing tree density and land Permeability in the campus.

Cultivation using drought tolerant plant.

Air:

Green mobility and infrastructure provisioning with vehicle free campus, promotion of use of public transport, use of e vehicle by staff students and faculty members.

Indoor plantation in the building for clean indoor environment.

Water:

Initiative to encourage responsible water management via rainwater harvesting.

Use of water efficient pictures in campus to reduce sludge generation.

Waste:

West segregation at source in the campus.

Following in organic waste management and organic waste management practices.

Energy conservation policy

The institution believes in energy conservation and ensures that the reasonable report is made to conserve energy. The energy policy of the institution promotes environmentally responsible practices and behaviour, experiment with innovative solutions combine learning and practical application through value education. It also abides by regulatory compliance and cost savings. The institution emphasizes cohesive planning to enable resource efficiency in sustainable approaches to enhance energy management for improved liability, health and climate.

A designated administrator will be responsible for energy conservation with an industry designated administrator. with an industry specialist to conduct an audit and provide timely feedback.

All personnel including students, mentors and institute staff whole heartedly take energy conservation as their responsibility.

Accurate records of energy consumption and cost will be maintained by the energy administrator.

Maximum use of clean energy by harnessing the renewable energy notably use of solar energy in the campus to reduce pollution from primary light generation using fossil fuel.

Use of energy efficient features throughout the campus of two conserve energy and save operation cost of building. Updating the pictures time to time as for technology advancement (switching form it can decent light to CFL to LED). Use of energy star rated or equivalent products to reduce energy consumption.

Further, to promote a safe healthy environment and to complement the energy conservation program institution will adhere to preventive maintenance.

Water management policy

The institute is committed to improve the management of water and reduce overall water consumption through the strategies and actions. The institute has been implementing number of national guidelines to conserve and manners water resources in the campus and proactively seeks measure to minimize its consumptions.

The campus seeks to become a zero campus and strip towards it in planning and implementing water strategies a balance approach is needed that maximize opportunity to align with multiple objectives.

The institute employees' hierarchical approach of water waste by reducing reusing and recycling water.

Infrastructure: ensure plumbing adequacy of water taps and sanitary fixtures. Contract water storage structures to meet campus water requirement and regular upkeep of water tanks in the buildings.

Installation of water efficient fixtures, fittings and appliance (dual flush cistern, waterless urinals and etc.) in the campus.

Resilience: deploy dedicated staff for maintenance of water system in the campus. Update periodic maintenance and repair of leaks.

Campus engagement and collaboration: organize water conservation workshop for the faculty and students on the campus. Organizing water saving event and drive proactively.

Alternative source: recharge ground quarter through rainwater harvesting by collecting runoffs from impervious surface.
