PROGRAMME OUTCOMES

BSc GENERAL

The BSc General programme imparts theoretical and practical knowledge in the basic sciences. The subjects taught in this institution that lead to a Bachelor of Science General degree are Botany, Physiology and Zoology. In the Choice-Based Credit System, students obtaining a General degree are expected to gain the same extent of competence in the subject they choose as Discipline 1 (DSC1), as they would in the Honours programme of that discipline. Students earning a BSc General degree are expected to:

- gain sound training in their chosen disciplines and be acquainted with current standards in their fields
- develop their critical thinking, creativity, analytical and problem-solving skills and a scientific temperament that they can put to the service of society through scientific discovery and technological innovation
- gain the ability for critical thinking and directing that ability towards comprehending and addressing urgent contemporary issues
- gain the foundation necessary to pursue postgraduate studies in the discipline they have chosen as their first option
- gain the foundation required to undertake academic research in the future
- gain the necessary computational and technological skills to pursue academic research as well as work in applied fields
- acquire the knowhow to engage in industrial work the ability to establish their own businesses or industrial units.
- gain the knowledge and skills required to enter careers in schoolteaching, the civil services, and various other governmental and non-governmental services, and above all, develop into responsible, conscious citizens.
